## **SUPER FANS :: CLASS OUTLINE**

### WHAT TO BRING TO CLASS:

- Henna Cone
- Blank Paper
- Pen or pencil
- Printed pages for class

- 1) What is Henna: the History and Science  
Also, WHY henna? Why is it so awesome for what we want to draw for this class?
- 2) Safety and Henna  
Why using real, natural, handmade henna is so important
- 3) Tips on Drawing with a henna cone  
How to hold the cone, how to position yourself and the person (or surface) you're drawing on
- 4) Some Basic Henna "Drills"  
Practice makes Progress!
- 5) Translating your Super Fandom into ART  
Sketching on paper and sketching on skin
- 6) Starting Simple  
Lines: Deathly Hallows; Triforce  
Silhouette: Disney
- 7) Get more complicated:  
Beware the Logo!  
Sketching from a Sketch
- 8) Creating your own design

### Using Henna Cones

## **1) Keep henna cones stored in the freezer.**

Set out at room temp to defrost for use (they'll be ready to use within about 15 minutes).  
Refreeze after use. They can be defrosted and refrozen multiple times.

- 2) I roll my cones with the tips already open, so they are ready to use! No need to open them any bigger. If there's a clog in the tip at the beginning, just use your fingers to lightly pinch the tip and squeeze through the clog.
- 3) Release the tape at the end to tighten up the cone and re-tape.
- 4) Clean skin with alcohol before applying henna – this removes any lotions or oils and helps create a better stain.
- 5) Hands and feet will always stain darkest because your skin is thicker there.
- 6) After henna dries, spray or dab lightly with sugar water (1 T sugar plus about 1/4 c water in a little spray bottle) or Hair Spray Gel to help keep the paste on your skin. (Clairol works nicely.) Or, if you are sleeping with the paste on, use paper medical tape (MeFix or HypaFix) to hold it in place while you sleep. OR simply wrap toilet paper around it, secured with a little piece of tape, so the henna doesn't flake off in your bed.
- 7) To test to see if henna still has good staining power, put a dot on your palm, let it sit for 5 min. and then wipe it off. If it leaves behind an orange spot, it is still potent! Cones will keep well in the freezer for about 6 months.

Cone ingredients: henna powder, black tea or water, sugar, essential oils (usually Lavender — on your freezer bag, "EO" indicates the type of Essential Oils in your cone)

### **Henna Care:**

Leave henna on the skin as long as possible, at least 2-4 hours, if possible (6-8 hrs is even better!)

When ready to remove paste, scrape it off rather than washing it off — olive oil or coconut oil work great to slough it off! Moisturize immediately!

Avoid water on the area for as long as possible after paste removal.

Stain will be orange at first, but will darken over the next 48-72 hours.

Stain will fade over the next 1-2 weeks.

Avoid chlorine and keep area moisturized to prolong stain.

[Real henna is never black: anyone claiming to use "Black Henna" is likely using commercial hair dye in their henna paste. This concoction contains a chemical called Para-Phenyldiamine (PPD) which is carcinogenic and illegal to apply to the skin.]
